*** Youth Development Frameworks**

A framework is a set of guiding principles, approaches, or parameters under which organizational activities are planned, implemented, and evaluated. It is a road map for youth workers, organizations and policy-makers that identifies desired long-term outcomes for young people and explains the youth development practices that need to be in place to achieve these outcomes. It also identifies the type of experiences that are present when young people achieve successful adulthood and shows the connection between practices at the organizational and program levels.
